TTL GARDEN Raised Bed SIENA XL Planter with Shelf
L120xH80xT40 cm - brown fir wood
(186123-004)

Hello,

Thank you very much for choosing a raised bed from TTL GARDEN.

Discover the joy of gardening with this practical and functional raised-bed planter SIENA from TTL GARDEN. This raised-bed planter made of natural fir wood has an ergonomic working height of 80 cm and offers all the benefits of raised-bed gardening.

Made of carbonized, heat-treated fir wood and therefore especially weather-resistant, it is not only sturdy but also very durable. The practical shelf is height-adjustable in 3 positions and provides additional convenience and storage space.

With your purchase, you are choosing high quality and the best possible service.

Thank you for your trust and we hope you enjoy your product.

Your TTL GARDEN team

General notes:

- Read the instructions completely before you start assembly and setup.
- Assembly is generally neither particularly complicated nor time-consuming. Since no heavy or complex components are used, experienced people can also assemble it alone. However, we recommend assembling it with 2 people.
- **Check that the delivery is complete before you start assembly!**
- For this, lay out the parts separately and check them against the part numbers for completeness before starting assembly.
- Have the required tools ready.
- If parts are missing, please contact us **unter Angabe der fehlenden Bauteile (siehe Lieferumfang)** via the **E-Mail Adresse service@ttl-commerce.de** – we will help you quickly and without hassle.
We guarantee feedback within 24 hours on weekdays.
From Monday to Friday, 8 a.m. to 6 p.m., you will usually receive a reply on the same day.
- We recommend lining the raised-bed tub with the supplied moisture-protection foil.
- Please also note our additional information sheet: “Notes and tips for setting up and filling raised-bed planters”

4		Short side panel	2
5		Foot	4

Pos	Figure	Description	Qty
6		Screw 3x30 mm	64
7		Screw 3,5x50mm	4
8		Moisture protection foil	1
9		Tacks	S: 10 M: 14 L: 20 XL: 20

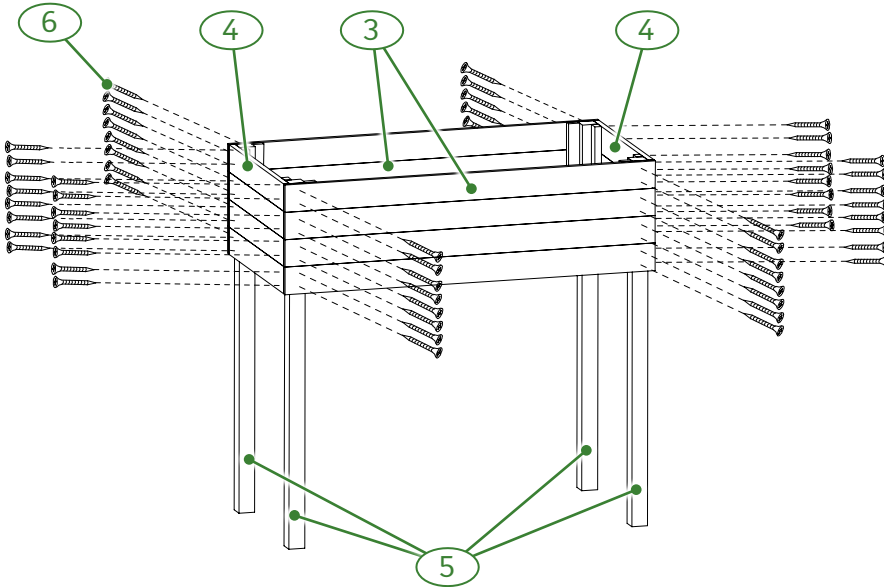

Info

Assembly of the raised bed is generally very easy. The side panels (3) and (4) are each **16x Schrauben 3x30 mm (6)** mounted to the raised-bed feet (5).

Due to the large number of screws, we recommend using a cordless screwdriver.

We recommend performing the assembly, especially of the raised-bed tub and feet, with the raised bed lying down (feet pointing upward). This ensures a straight top edge of the raised bed.

Steps **1** bis **8** show you the easiest way to assemble.

IMPORTANT NOTE

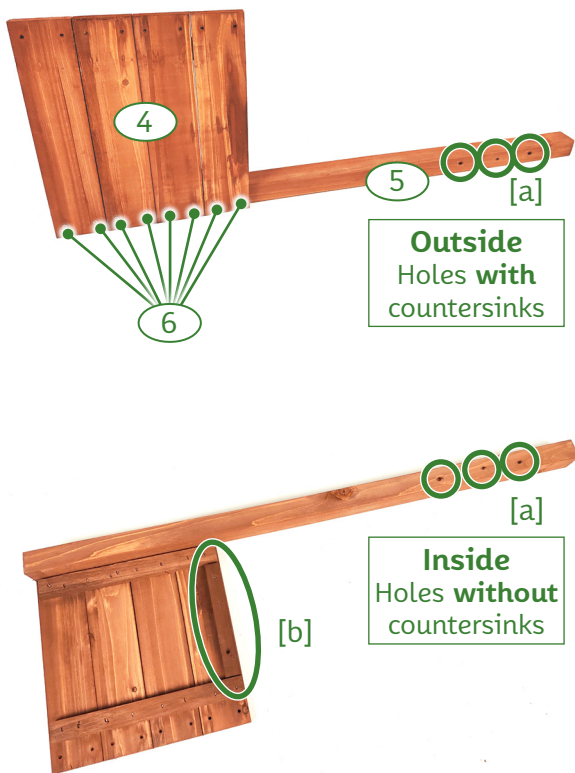

Wood is a natural product!

We are here to help you if you have any problems!

Despite intensive quality checks, minor splinters, knot holes or irregularities may occur in rare cases.

If this is very bothersome,
please contact us at
service@ttl-commerce.de

1

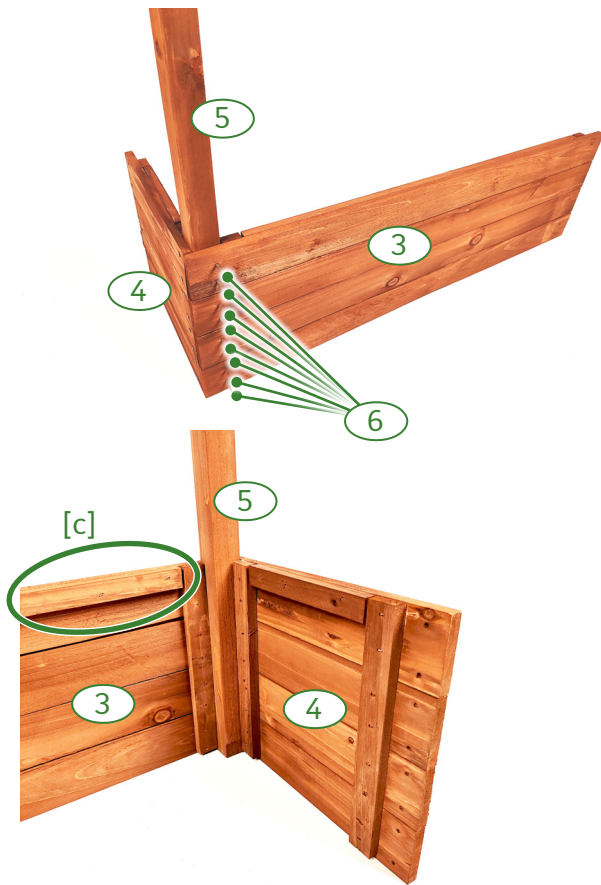

- Attach the short side panel (4) using **8x Schrauben 3x30 mm (6)** to the raised-bed foot (5).
- **Make sure the 3 drill holes [a] for the shelf in the raised-bed foot (5) are in the correct position.**
The countersunk holes for the screws must face **outward**.
- **Make sure that in the short side panel (4), the support strip [b] for the base is in the correct position.**
- Ensure straight, square assembly.

Warning – Prevent the boards from splitting by using pre-drilled holes!

Wood is a natural product, so depending on the drying level and screw placement, boards can split – with careful handling you can easily prevent this!

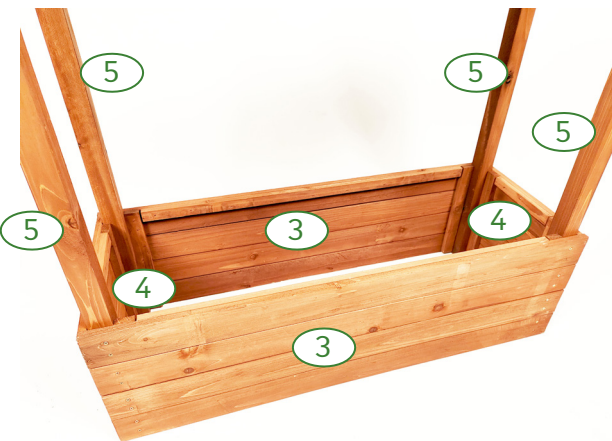

- If the boards tend to split, you can flatten the tips of the screws slightly with a metal hammer.
- Alternatively, you can additionally pre-drill the raised-bed feet through the screw holes in the side panels with a thin drill bit.

2

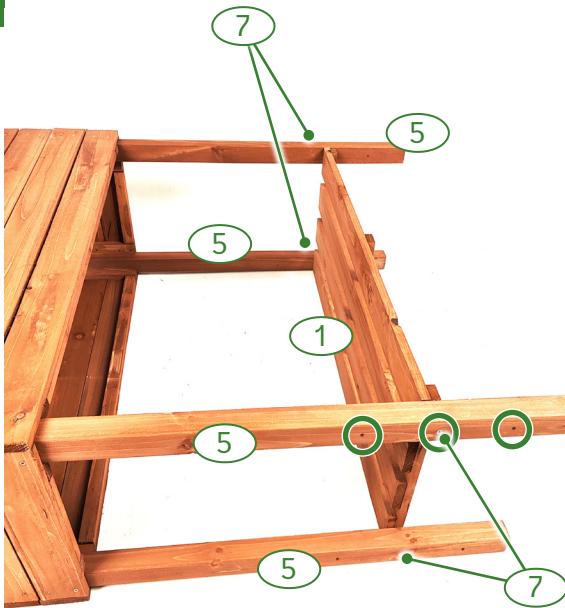

- Attach the long side panel (3) using **8x Schrauben 3x30 mm (6)**.
- Make sure the support strip [c] for the base is in the correct position.
- Ensure straight, square assembly.

3

- Repeat steps **1** and **2**, to complete the assembly of the side panels (3) and (4) and the raised-bed feet (5).
- **Pay attention to the correct positions of the drill holes in the feet and the correct positions of the support strips for the base in the side panels.**
- Ensure straight, square assembly.

4

- Attach the shelf (1) using **4 screws 3.5x50mm (7)** to the raised-bed feet (5).
- There are three drill holes on the raised-bed feet for attaching the shelf (1). Choose the height that suits you.
- Ensure straight, square assembly.
- We recommend to pre-drill the shelf through the screw holes in the raised-bed feet to prevent splintering.

5

- Place the raised-bed base (2) into the raised-bed tub.

CAUTION:

Insert the raised-bed base (2) centered. Make sure to insert one long side first, then guide the other long side straight down.

NOTES

If the raised-bed base gets stuck when inserting:

- If the raised-bed base sticks, this is usually due to it being inserted at an angle.
- Do not force the base into the raised bed!
- Remove the raised-bed base (easiest by pushing from underneath).
- Reinsert the raised-bed base and make sure it fits correctly in all corners.
- The raised-bed base should now slide in easily and fit properly.

6

- Line the raised-bed tub with the supplied moisture-protection foil (8).
- The foil can be trimmed to size as needed.
- Fasten the foil to the inside of the raised-bed walls using the tacks (9).
- Alternatively, the foil can be used without additional fastening and will be held in place automatically once the raised bed is filled (see separate information sheet).

The raised bed SIENA is fully assembled and ready for use!

FAQs: Frequently asked questions about using this product:

Here we answer frequently asked questions so you can get the most out of our product.

Question 1: Who do I contact if I have questions or problems?

We are a service-oriented company committed to sustainability with **headquarters and our own warehouse in Germany!**

If you have questions, please contact us directly! We will help you quickly and easily! Our experienced in-house service team replies **within 24 hours on weekdays** – personal, competent and solution-oriented.

►► **The fastest and easiest way to reach us is via the marketplace's messaging function:**

On Amazon, open your orders, select the item and click “Contact seller” or “Ask a question about this product”.

►► **Another contact option is a direct email to us:**

service@ttl-commerce.de

Question 2: What should I do if a component is missing or defective?

We offer our own spare-parts service with advance replacement within 24 hours. If a part is missing or defective, please tell us the part number from the package contents.

►► **Please use the contact options explained in Question 1 as explained.**

Give us the chance to clarify your issue directly with you – a return or a bad review is usually not necessary. Together we will always find a solution!

Question 3: Is lining the wooden raised bed with the foil necessary?

Not mandatory, but we recommend using the moisture-protection foil.

The fir wood of the raised bed was carbonized by heat treatment under a protective atmosphere. This increases resistance to moisture and pests.

We still recommend using the foil for the following reasons:

- During carbonization, the wood remains open-pored and would therefore absorb water if exposed to prolonged, intensive moisture.
- The pre-shaped foil prevents the side panels from getting dirty over the long term due to leaking water, soil residue and mineral deposits.

Question 4: What is the best way to care for the raised bed?

During carbonization, the wood remains breathable and open-pored. By additionally applying oils, varnishes or stains, you can maintain durability and appearance over the long term.

Question 5: Should I additionally perforate the moisture-protection foil at the bottom?

The moisture-protection foil is already provided with sufficient holes at the factory and thus prevents waterlogging. If necessary, you can perforate the foil further or close

individual holes.

Please also note the information in our separate leaflet.

Our wooden raised beds at a glance

Discover the joy of raised-bed gardening with this practical and functional raised-bed planter from TTL GARDEN.

You can choose between four different versions:

Size S (L80xW30xH80 cm):

- Dimensions: 80 cm length, 30 cm depth, 80 cm height
